

Willian Boschetti Adamczyk

Economist and Data Scientist

E-mail: willianbadamczyk@gmail.com

Economist and Data Scientist with a strong focus on lifelong learning and the future of work. As a university professor and international consultant, I have developed projects for both companies and governments, bridging the gap between economics and information technology teams. My objective is to apply my expertise machine learning, text processing, and impact evaluation methodologies to new research and data science projects.

Education:

- Postdoctoral fellowship in Management at Univali (2025–2027).
- PhD and Master's degree in Economics from PUCRS (2015–2021).
- Specialisation in Corporate Finance from Univali (2025).
- Bachelor's degree in Economics from UFRGS (2008–2013).

Key skills:

- Expertise in econometrics, machine learning, NLP and LLM techniques for regression, classification and impact evaluation.
- Programming in R, Python, SQL, PySpark and SparkNLP.
- Experience in big data architecture using MongoDB and APIs, developing dashboards and interactive visualisations with QlikView and Flourish.
- Advanced proficiency in Excel, PowerPoint, Word and LaTeX.
- English (Fluent), Portuguese (Native), French (Intermediate).

Professional experience:

- Economist and Consultant at the International Labour Organization (2022–2025):
Collaborated closely with international researchers on the writing and review of high-impact reports, notably the 2026 ILO flagship report on “Lifelong Learning and Skills for the Future”. Structured a big data system integrating MongoDB, PySpark and SparkNLP to analyse large-scale job vacancy datasets, applying advanced text processing, machine learning and LLM techniques to produce research insights. Delivered technical presentations and developed interactive visualisations using Flourish to translate complex findings for a global audience.
- Consultant at Future for Technology and Development (FutureTech) (2025):
Contributed to the “Optimising Workforce Efficiency in Oman’s Public Sector” report, helping devise national frameworks for reskilling and redeployment. I developed automation classification methodologies for Omani occupations using machine learning and Gemini API calls, validating results against international skills frameworks and contributing to strategic recommendations for upskilling the public workforce.

- Research Coordinator at the National School of Public Administration (2021-2022):
Managed a multidisciplinary team at the Evidence Express unit, delivering quantitative research solutions for the Brazilian Federal Public Administration. I oversaw the production of impact evaluations and reports using SIAPE, SIAFI, RAIS and PNAD datasets, following evidence-informed public policy methodologies. Maintained a strong focus on delivering high-quality results within agile timeframes, ensuring strict commitment to deadlines and delivering technical presentations to communicate evidence-based insights.
- Visiting Researcher at the National School of Public Administration (2020–2022):
Produced reports on the future of work and the impact of automation in the Brazilian public sector, utilising machine learning techniques to project staffing needs for the Federal Executive. Key findings were featured in the national press and presented to the presidency of ENAP and the Ministry of Economy.
- Professor at Centro Universitário Estácio de Sá Florianópolis (2021–2022):
Lectured in undergraduate and postgraduate courses in Administration and Information Systems, covering Economics, Statistics, Data Mining and R programming.
- Professor at Faculdade de Tecnologia Nova Palhoça (2017–2020):
Lectured in undergraduate and postgraduate courses in Management, Accounting and Engineering, covering Calculus, Statistics, Capital Markets and Strategic Planning. Supervised students and served on institutional planning committees.
- Data Analyst at Hostinger International (2017–2018):
Developed KPIs for sales, finance and customer support, creating visualisations in QlikView to communicate strategic insights during meetings with high management. I integrated data via MySQL and APIs while analysing financial and marketing performance through Google Analytics, collaborating closely with software development teams and the Lithuanian headquarters.
